DETAILED ACTION

Election/Restrictions

1. Claims 9-14 and 17-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 7/29/05.

Claims 9-14 and 17-20 should be canceled in the next response of this office action.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 2, 4, 5, 8, 15-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Lagerqvist et al U.S. Patent Number 5,737,695.

Re Claims 1, 4, 5, 8, 15-16, fig. 4 teaches a TDMA transceiver 430 inside the base station 400 for modulating a carrier signal during active slots under controlled by the Controller 440 (system controller; computer) whereby the 440 functions according to fig. 5. Fig. 4 includes a A/D converter 405 coupled to the VAD 406 wherein during period of silence (random bits) VAD outputs a signal to the Controller 440 for enabling

DTX (See step 550 of fig. 5) wherein (See col. 3, lines 10-68) during this mode the transmitter is disabled during the particular slots (inactive slots) (See col. 2, lines 55-65).

Re Claim 2, refer to Claim 1, during DTX, the transmitter (modulator) during the particular slots wherein during this period is at least two symbol.

Allowable Subject Matter

4. Claims 3, 6, 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter:

In combination with claims 1 and entirety of 3, prior art fails to teach the modulator transmitting different carrier signal during active and inactive slots.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Lee whose telephone number is 571-272-3130. The examiner can normally be reached on Monday to Friday from 8:30AM to 6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ricky Ngo can be reached on 571-272-3139. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
